CHALLENGE 3

Your task in hand is to modify the navbar of your website in the following ways if not created you are expected to create one.

Navigation Transformation:
Redesign your website's navigation structure to feature a left-aligned sidebar.
Move the navigation elements, such as links or icons, from the top to the left side of the screen.

Responsive Design:
Ensure that your new sidebar navigation works seamlessly across various screen sizes, from desktop to mobile devices.

User-Friendly Interaction:
Implement smooth animations or transitions for opening and closing the sidebar.
Consider using icons or labels for each navigation item to enhance user understanding.

Consistency and Accessibility:
Maintain a consistent design style that complements your website's theme.
Ensure accessibility by using appropriate color contrasts and providing alternative text for icons.

Best of luck,
Devsprints Team
